We also have a Cluster Research Centre in the subject of Hindi.

The college has earned a distinguished position in the State of Goa for its excellence in academics, research, and co-curricular activities. It is affiliated to Goa University and is recognized by the University Grants Commission (UGC), New Delhi, under Sections 2(f) and 12(B) of the UGC Act, 1956.

ABOUT THE SEMINAR

Today, Artificial Intelligence (AI) has emerged as one of the most transformative technologies driving global change. It is bringing unprecedented advancements in education, healthcare, agriculture, industry, governance, law, finance, media, research, and almost every aspect of daily life. AI has opened new avenues for innovation, efficiency, and productivity, while simultaneously raising significant concerns related to ethics, privacy, cybersecurity, employment, social inequality, and accountability.

The objective of this International Seminar is to provide a common platform for academicians, researchers, students, policymakers, industry experts, and technology professionals to discuss the opportunities, challenges, innovations, and global experiences associated with Artificial Intelligence.

Through this seminar, meaningful deliberations will be encouraged on the responsible, inclusive, and human-centric application of AI. It also aims to strengthen collaboration among education, research, industry, and society, thereby promoting the effective and ethical use of Artificial Intelligence.

This seminar is not merely an academic event; rather, it is a significant initiative toward shaping a knowledge-driven, innovative, and responsible AI-enabled future. Its objective is to ensure that future technologies are integrated with human values, ethical principles, and sustainable development, enabling AI to play a constructive role in society, education, and nation-building.
